INTERNATIONAL CONFERENCE
ON
MACHINE VISION AND AUGMENTED INTELLIGENCE (MAI 2022)
(04th - 06th MARCH 2022)

ABOUT THE CONFERENCE

Machine vision and Augmented Intelligence conference brings together the academicians, researchers, industry people and students to come together and discuss the current state-of-the-art developments of the fields. The conference will provide a benchmark and platform to the "AATM NIRBHAR BHARAT" by using modern augmented intelligence. The conference theme encompasses all industrial and non-industrial applications in which a combination of hardware and software provide operational guidance to devices in the execution of their functions based on the capture and processing of images. Today, manufacturers are using machine vision and Augmented Intelligence based metrology to improve their productivity and reduce costs. Machine vision and Augmented Intelligence integrates optical components with computerized control systems to achieve greater productivity from existing automated manufacturing equipment. This will becomes very useful to improve the efficiency in different field like security, crime detection, forensic, Inventory control etc. The conference will continue the tradition of the world's leading experts giving keynote speeches, high quality tutorials, panel discussions, workshops, tutorials, and products and prototype demonstration, social events, and fun. We are preparing a galore of surprises, which we will gradually reveal as the date draws closer.
